ABOUT THE PROGRAM - BACHELOR OF PSYCHOLOGY

The Bachelor of Psychology program provides a basic knowledge and skills required to understand the behavior of both individual and groups, which is necessary to influence the way educators, policy makers and the community surveyor work about mental health and the working of human mind. Students incorporate and integrate comprehensive education in basic areas, including development of understanding of social, cognitive, biological and abnormal psychology among individuals. The program teaches the associations between the brain and behavior, the processes that determine speech, create and keep memories or respond to stress. The Bachelor of Psychology programme curriculum focuses on developing an understanding of key theoretical concepts and on practicing skills associated with the areas of assessment and counseling. Practical application of the knowledge and skills will be demonstrated in projects reflected at both personal and professional level.
